

Complete On-Site Switchgear Services

Horner Industrial Services, Inc. offers a complete line of switchgear services including modifications and re-rates, diagnostics, evaluation and testing, repairs and conversions of all major brands of switchgear.

The ever increasing cost of power for industry necessitates regular switchgear maintenance by qualified electrical service technicians. The repair and upgrading of existing equipment will significantly reduce operating costs, new equipment costs and minimize unscheduled downtime.

The business demands of today require peak performance in every department. Too often overlooked is the plant electrical distribution system.

Before you get caught in the dark, call Horner. We have talented, trained technicians to inspect, test and evaluate your switchgear to assure proper operation.

Your 24-Hour Industrial Solutions Provider

Service: In House/On-Site

- Installation
- Start Up
- Maintenance
- Troubleshooting
- Inspection
- Cleaning
- Lubricating
- Emergency Service
- Preventative Maintenance
- Engineering Reports
- Oil Testing

Retrofitting and Upgrading

- Low Voltage Circuit Breaker to Solid State Trip Devices
- Medium Voltage Circuit Breaker to Vacuum Technology

Testing: Low Voltage

- High Current Injection to Manufacturer's Time-current Curve
- Phase to Phase and Phase to Ground Insulation
- Contact Resistance Test
- Acceptance Testing (New Equipment)

Testing: Medium & High Voltage

- Power Factor
- High Potential
- High Current Injection to Manufacturer's Time-current Curve
- Phase to Phase and Phase to Ground Insulation
- Contact Resistance Test
- Acceptance Testing (New Equipment)
